PROFILE

Hi, I'm Tunahan

I'm a Management Information Systems student at Boğaziçi University.

I'm especially interested in cybersecurity — spending time on platforms like TryHackMe, building small projects and lab environments to improve my skills.

I regularly challenge myself with CTFs to keep learning, while knowing there is still a long way to go.

I'm always open to learning, experimenting, and adapting.

Beyond tech, I'm also into swimming, scuba diving, and especially cooking.

Cooking for me is more than a hobby — it's where I experiment, stay patient, and get creative.

EDUCATION

Bogazici University

2022-.....

Bachelor of Science Management Information Systems

WORK EXPERIENCE

Kunduz *June 2023- May 2024 / Istanbul, Turkey*

Operations Team Member

- Resolved customer inquiries and ensured operational efficiency.
- Improved workflows and contributed to product development.
- Managed customer feedback to enhance satisfaction.

Black Butte Ranch *Summer'24/ Oregon, USA*

Line Cook

- Gained stress management and decision-making skills in a high-pressure environment.
- Improved time efficiency and teamwork while ensuring quality meal preparation.
- This experience, though unrelated to my career, taught valuable lessons in adaptability and performance under pressure.

International Educations of Turkey -IEFT- *Istanbul,Turkey*

Translator

- Provided English translations for exhibitors and visitors, ensuring smooth communication during discussions and negotiations.

BUSİBER *July 2025- August 2025* *Istanbul,Turkey*

CyberSecurity Intern

- Performed penetration testing on web applications and systems, preparing detailed security reports.
- Conducted OSINT research to support investigations and vulnerability assessments.

SKILLS & PROJECTS

- **Docker and Plugin Development:** Deployed and managed containers using Docker, running Apache Superset and creating a simple custom plugin.
- **Cloud Platforms:** Created and managed instances on AWS, Azure, and Google Cloud, designing and hosting basic web pages as part of introductory-level projects.
- **Data Visualization:** Conducted data analysis and created impactful visualizations using SPSS, effectively interpreting complex datasets
- **Penetration Testing:** Performed web application tests, found vulnerabilities, and prepared concise reports.
- **OSINT Research:** Collected and analyzed open-source data, delivering clear security insights.

PORTFOLIO

- **GitHub:** github.com/tunischka
- **Portfolio Website:** <https://tunischka.github.io/my-website/>

CERTIFICATES

- **McKinsey & Company – Forward | Issued:** May 2025

Completed foundational modules on problem-solving, communication, digital collaboration, and self-leadership.
